ANKIT GUPTA

Python Developer • AI/ML Engineer

+91-9368622962 • ankig4515@gmail.com • Noida, UP • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Enthusiastic and self-driven B.Tech Computer Science fresher with a strong foundation in Python programming, machine learning, and AI application development. Passionate about building real-world intelligent systems — from LLM-based agentic AI tools to NLP pipelines and full-stack web applications. Hands-on experience in designing, training, and deploying ML models, integrating GenAI APIs, and building accessible web interfaces using Flask and Streamlit. Actively seeking an entry-level Python Developer or AI/ML Engineer role to contribute meaningfully, learn from industry professionals, and grow into a well-rounded software engineer.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript (basics), HTML5, CSS3
ML / DL	Machine Learning, Deep Learning, NLP, Scikit-Learn, PyTorch, Hugging Face Transformers (T5), NumPy, Pandas, Matplotlib, Seaborn
GenAI / LLMs	LLM Integration, Prompt Engineering, Agentic AI, RAG Systems, GenAI Application Development, YouTube Transcript API
Frameworks	Flask, FastAPI, Streamlit
Web Dev	REST API Design, HTML5,CSS3
Databases	MySQL, MongoDB
Tools & DevOps	Git, GitHub, Jupyter Notebook, VS Code, Vercel, Streamlit Cloud, Postman
Core Concepts	OOP, Data Structures & Algorithms (basics), Model Training & Evaluation, Deployment, API Integration

PROJECTS

YouTube Video Analyser Agent Live Demo | GitHub

Python • Streamlit • LLM (Grow API) • YouTube Transcript API • Agentic AI • Prompt Engineering

- Architected an end-to-end AI agent pipeline: YouTube URL parsing → transcript extraction via YouTube Transcript API → structured LLM prompting → AI-generated summaries, key insights, and detailed analysis — with robust error handling for invalid URLs and unavailable transcripts.
- Designed and deployed a responsive dark-themed Streamlit web app with clean UI, labelled inputs, and real-time output; live on Streamlit Cloud with consistent rendering tested across Chrome, Firefox, and Edge.
- Applied prompt engineering best practices to optimise LLM output quality across diverse video topics and lengths, demonstrating practical GenAI and agentic AI development skills.

SmartClass AI — Ed-Tech Web Application Live Demo | GitHub

Python • Flask • REST API • HTML5 • CSS3 • JavaScript • Vercel

- Built a full-stack AI-powered ed-tech platform with a Flask RESTful backend; landing page showcases an intelligent attendance system concept using Face Recognition and Voice Processing — demonstrating AI product thinking and system design.
- Implemented WCAG 2.1 AA accessibility throughout: semantic HTML5 with proper heading hierarchy (h1–h3), visible focus indicators, keyboard navigation, sufficient colour contrast, and descriptive alt text; validated using WAVE and browser DevTools.
- Followed production-aligned QA practices: checklist-based self-review, issue documentation, and iterative code improvements; deployed to Vercel achieving zero downtime and cross-browser compatibility.

EDUCATION

B.Tech — Computer Science & Engineering CGPA: 7.0+

Dr. APJ Abdul Kalam Technical University, Lucknow

Senior Secondary (XII) — CBSE 66%

Secondary (X) — CBSE 74.5%

CERTIFICATIONS & STRENGTHS

- AIML Prime — Apna College (ML, DL, NLP, GenAI)
- Web Development — Apna College (HTML5, CSS3, JS)
- Fast learner • Detail-oriented • Team player
- Open to feedback • Problem-solver • Self-driven
